Heavy Showers Render Conditions Bad for Wounded--Surgeon Shot Down by the Spaniards.

Spanish Forces in Santiago Estimated at 11,000-Displeased with Conduct of the Cubans-Thousands of Refngees Seeking Safety.

July 5, via Port Antonio, July 7.—The weather continues bad with heavy showers almost every day. It has made things bad for the wounded. Despite all the care bestowed on them by the medical staff, two officers died today in the hospital, Lieutenant Lieunant fight many were wished to the wounded at points along the roadside. Out of 1,000 cases treated at the hospital of the first division, only 16 have died. The general health of the United States troops is excellent. No yellow fever is reported. The doctors from the fleet are work-ing day and night. The wounds show that the Spaniards are not only using ex-plosive bullets, but also brass covered posive bullets, but also brass covered bullets with the ends filed. The latter make ghastly wounds, as when they strike the brass lining spreads out tear-ing the flesh like barbed wire. Spanish sharpshooters are firing at the Red Cross society people and at the ambu-lances. The surf makes shipments of the wounded to transports and hospital ships very difficult, as there is no pier and landing facilities are meagre.

Corporal Keen and Private Barr, of Battery A, second artillery have been highly commended for gallant conduct during the terrific fighting on Saturday. When the battery tried to advance beyond El Poyo, Privates Helm. Smith and Underwood were blown to pieces by shells. Sergeaut Harvey and Privates Veito and Cornford were badly hurt and several other men were woun ded including Privates Barr and Keene. One of them was shot three times and another twice but in spite of their injuries they stuck to the crippled guns until the enemy was forced to give up the assault.

The Spaniards estimate the force be hind the fortifications at Santlago at about 11,000, including the 4,000 re-en-forcements brought by General Pando. The forces, besides General Pando's regulars and 2,000 volunteers, are not to be depended upon. Eleven hundred marines and sailors were withdrawn from the city when the Spanish fleet made its Ill-fated sortie.

General Young in Ill Health. Copyrighted by Associated Press.— Camp Siboney, July 5, via Port Antonio, July 7.—General Young, commanding the 1st brigade of the cavalry division, left here today for Key West in bad health, on board the Cherokee. Brigadier General Duffield succeeds to his command. General Young yesterday refused to issue further rations to the Cubans until advices are received from Washington in answer to his expose of the situation here. The Cubans refuse to assist in the hospital and commissary departments, claiming they are soldiers and not laborers. The same answer was given by them to General Baker when he asked the Cubans to help open the roads for the transportation of supplies to the front. This, to-gether with General Garcia's not preventing the entrance of General Pando's re-enforcements into Santiago, has caused discontent among the officers and troops. General Young reported the situation to the United States govcrnment. Meanwhile he placed the Cubans in a separate camp and under police regulations, and turned them over to Miss Clara Barton for rations. Heart Breaking Exodus.

Copyright by Associated Press — El Caney, province of Santiago the Cuba, July 5, via Port Antonio, July 7.—Fifteen thousand refugees today filled the roads leading from Santiago to El Caney, Boniato, San Vicente and San Luis. The exodus was in response to a procla-mation issued by General Rees, the political governor in Santiago, who gave all people desirous of leaving the city to escape a bombardment, the chance to go between 5 and 9 o'clock this morning. As the fugitives had no means of carrying water and there is none on the road between Santiago and El Caney, there was great suffering. Men, women and children lay alongside the road, wherever there was a small patch of shade, begging the passers by, par-ticularly the soldiers with dangling can-teens, for water, which was always free-ly tendered.
